

A Research Study for Adults with General Anxiety Disorder

Dr. Thomas Gualtieri at North Carolina Neuropsychiatry in Chapel Hill needs volunteers, ages 18-65, to participate in a clinical research trial of an investigational medication for anxiety.

If you experience the following symptoms on a regular basis, you may be suffering from Generalized Anxiety Disorder

- Difficulty controlling anxiety and worry
- Frequent muscle tension
- Irritability
- Problems with sleep
- Trouble concentrating
- Become tired easily
- Feel restless or on edge

Subject Inclusion/Exclusion Criteria:

- Ages 18-65 years old
- General Anxiety Disorder
- Our center is only able to enroll participants from the surrounding metropolitan area due to the frequency of office visits

Evaluation:

Study related psychiatric evaluation, and care, and study medication are provided at no cost to qualified participants.
